Laboratory Services now Available!

Gamma Dynacare

For ease of patient care, I am now offering laboratory services through Gamma Dynacare – all tests that are done through a Medical Doctor's office are also available through this office. However, these tests are not covered by OHIP when done through me, and as such there is an extra cost associated.

The following common laboratory tests are offered through this office:

- Lipid panel
- Complete Blood Count
- Iron panel
- Thyroid panel
- Cancer marker blood tests
- Heart enzymes
- Blood vitamin levels
- Blood mineral levels
- Food allergy testing

And many others – please ask me about other tests if you are concerned about something and it is not listed here.

Rocky Mountain Analytical Salivary Testing

Rocky Mountain Analytical is an accredited Calgary medical laboratory focusing on wellness testing. Saliva hormone testing may reveal hormone imbalances that contribute to chronic health problems or hormone conditions. It can also be used to monitor hormone replacement therapy (HRT) and in anti-aging and disease prevention programs.

Rocky Mountain Analytical test orders must be signed by a regulated health professional. This includes: physicians (MD), naturopaths (ND), pharmacists (RPh) and chiropractors (DC). The College of Physicians and Surgeons restricts which health professionals may order medical laboratory tests. All test requisitions must be signed by a regulated health professional before testing will proceed.
